Trade-marks Journal

Vol. 65 No. 3324

General Information

The *Trade-marks Journal* is published every week in compliance with Rule 15 of the *Trade-marks Regulations*. The Registrar of Trade-marks cannot guarantee the accuracy of this publication, nor assume any responsibility for errors or omissions or the consequence of these. All mail relating to trademarks should be addressed to the Registrar of Trade-marks, 50 Victoria Street, Gatineau, Quebec, Canada, K1A 0C9.

Electronic *Trade-marks Journal*

The *Trade-marks Journal* is available in electronic form on the CIPO web site (http://cipo.gc.ca). The *Journal* is available in PDF format and can be downloaded free of charge, viewed and printed with Adobe Acrobat Reader. The electronic form of the *Trade-marks Journal* is the official version.

The *Journal* is also available in a printable HTML format as an alternate official version, and contains a search function to narrow and customize the *Journal* content to user defined areas of interest.

Official Languages

The *Journal* is available in English and in French. The application details are displayed based on the language of the application. If the language of the application is English, the goods, services, or other text and description appearing in the English version of the Journal are in the language filed by the applicant. If the language of the application is French, the goods, services, or other text and description appearing in the English version of the Journal have been translated. Any registration resulting from the application will be restricted to these goods or services described therein.

Filing Dates

The filing date of each trademark application advertised in the *Trade-marks Journal*, including those to extend the statement of goods or services of an existing registration, is shown next to the application number in the sequence of Year, Month and Day.

Nice Classification

The *Journal* includes reference to the Nice classification when the goods or services of an application have been grouped and classed by the applicant in accordance with the current version and edition of the Nice Classification.

Opposition

Any person who has a valid ground of opposition (see section 38 of the *Trade-marks Act* for the grounds of opposition) to any application for registration of a trademark or to any application for registration of a trademark extending the statement of goods or services advertised in this *Trade-marks Journal* may file a statement of opposition with the Registrar of Trade-marks within two months from the date of issue of this publication. The prescribed fee must accompany the statement of opposition.

Machine tools and mechanical apparatus for the generation of compressed air, vacuum pressure and air flow, namely, compressed air pumps, vacuum pumps, coupling valves, hoses and filters; power operated compressors for the compression of air; power operated blowers for the compression, exhaustion and transport of gases; industrial air blowers; air suction machines, namely power operated air blowers and power-operated vacuum pumps; vacuum pumps being machines; replacement parts for machine tools and mechanical apparatus for the generation of compressed air, vacuum pressure and air flow, namely, compressed air pumps, vacuum pumps, coupling valves, hoses and filters, power operated compressors for the compression of air, power operated blowers for the compression, exhaustion and transport of gases, industrial air blowers, air suction machines, namely power operated air blowers and power-operated vacuum pumps, and vacuum pumps being machines; machines for the generation of compressed air; pneumatic transporters, consisting of air blowers and tubes for transporting bulk material; engines used in machines for the generation of compressed air; compressed air motors; compressed air pumps; compressed air vessels being parts of machines; compressed air pressure tanks used in machines and installations which generate and regulate compressed air; pumps being parts of machines, motors and engines; turbines for use in the generation and regulation of compressed air; machine tools for the compression, exhaustion and transport of gases; pneumatic hammers, pneumatic chisels, pneumatic drills; filters used in machines, motors and engines for the generation of compressed air; air filters for motors and compressors; catalytic converters for the adsorption of hydrocarbon vapors (gas catalytic converters); activated carbon absorbers and catalytic converters, being parts of machines; activated carbon filters for use in compressed air systems, being parts of machines; high pressure air filters used in machines for the generation of compressed air; condensate separators being parts of machines, namely centrifugal separators; automatic vacuum cleaners; cooling devices, namely cooling radiators for compressors, motors and blowers; coolers for motors, compressors and blowers; air condensers; condenser installations, namely, air condensers and air-cooled condensers used in refrigeration; de-aerators being parts of machines; oil-separators and deoilers for separating oil from air being parts of machines; fittings for compressors and machines, namely condensation separators, drain taps, valves, air receivers, dryers, coolers, anti-vibration mountings, controls, pumps, starter and protection panels, electric motors and pipes; taps being parts of machines and motors; mechanical seals being parts of machines; compressed air main charging systems comprised of controllers and regulators for the control and regulation of compressed air pressure, being parts of machines; regulators being parts of machines for compressors and for vacuum pumps; speed governors for compressed air machines and motors; pressure regulators being parts of machines, namely compensation tanks; valves being parts of machines; pressure reduction valves being parts of machines; pneumatic controls to regulate and control the operation of industrial machines and motors; motors for air compressors, blowers, vacuum pumps; general purpose electric motors and engines namely electric motors and engines for industrial machinery; machine housings, namely housings for compressed air machines, vacuum pump machines, air suction machines, compressors and blowing machines; leveling mounts for machines; stands for machines, namely stands specifically designed to support powered machinery; tables for machines, namely tables specifically designed to support powered machinery; couplings and driving belts for machines for industrial use, other than for land vehicles; gear boxes for industrial machinery; ball-bearings for use in compressed air machines; shaft couplings being machines; cranks being parts of machines; crank shafts; machine wheels being parts of compressed air machines, blowers and vacuum pumps; axles for machines; pump diaphragms; superchargers for compressed air machines; turbo compressors being parts of machines to compress air; fans for motors; anti-pollution controllers and regulators for use in motors and compressors which are parts of machines and motors; heat exchangers being parts of machines; pneumatic, hydraulic and mechanical controls and pneumatic and hydraulic and mechanical regulators, all being parts of machines, air compressors, blowers and vacuum pumps; electric and electronic controls for air compressors, air blowers, vacuum pumps and electric and electronic controls for air treatment apparatus and air treatment devices, namely for, air dryers, air filters, air purifiers, air coolers, condensate drains and oil mist eliminators; electric and electronic regulating devices for regulating gas flow of compressors, blowers, vacuum pumps, and electric and electronic regulating devices for regulating gas flow of air treatment apparatus and air treatment devices, namely for, air dryers, air filters, air purifiers, air coolers, condensate drains and oil mist eliminators; electronic control devices, namely, compressed air main charging systems for the regulation of compressed air; automatic time switches, automatic weighing machines; recorded computer programs namely software for operating, controlling, monitoring, protecting and maintaining air compressors, air blowers, air dryers, air filters, air purifiers, air coolers, condensate drains and oil mist eliminators, all solely for peripheral devises and for the control of machines and mechanical devices for the generation of compressed air; computers, computer installations, namely computer hardware, solely as peripheral devices and for the control of machines and mechanical devices for the generation of compressed air, vacuum and air flow and for the treatment of compressed air; computer output equipment, namely, printers, plotters, terminals, and screens, solely as peripheral devices and for the control of machines and mechanical devices for the generation of compressed air; electrotechnical and electronic user interface apparatus and devices, namely electric control panels; sensors for the evaluation of physical quantities, namely for the acquisition of pressure, of temperature, of voltage, of power consumption, of the amplitude of vibration, of operation time, of humidity and of the flow rate of air and other gases; parts of electric control devices, namely electric circuits; air flow controllers and regulators for air treatment apparatus and air treatment devices, namely for air dryers, air filters, air purifiers, air coolers, condensate drains and oil mist eliminators.

electrotechnical and electronic user interface apparatus and devices, namely electric control panels for use in the generation and regulation of compressed air; sensors for the acquisition of physical quantities, namely for the acquisition of pressure, of temperature, of voltage, of power consumption, of the amplitude of vibration, of operation time, of humidity and of the flow rate of air and other gases; parts of electric control devices, namely electric circuits; apparatus, devices and machines for air treatment, namely, for compressed air conditioning for the separation and deposition of solid and liquid contamination of the compressed air, namely drying, air cooling, air conditioning and air cleaning units; installations to filter air, to remove contaminants arising from the compression of air; industrial air purifiers; air dryers for the removal of moisture and water vapor from compressed air and gases; desiccant (adsorption) dryers; refrigeration dryers; membrane dryers; desiccant and adsorption dryers for the removal of moisture and water vapor from compressed air and gases; air dryers for use in air conditioning systems; refrigeration dryers; air cooling devices, namely cooling radiators for compressors, motors, blowers and vacuum pumps; air coolers, namely compressed air coolers; condensate drains for compressed air applications being parts of refrigerating devices; heat exchangers; condensate water purifiers and filtrators; air filters for air conditioning; compressed air filters being parts of household and industrial installations, namely filters for compressed air conditioners, compressed air coolers, compressed air dryers for compressed air treatment apparatus for the separation and deposition of solid contamination of compressed air; air filtering systems for compressor installations; compressed air filters; dust filters for use in compressed air installations; air purifying lamps having a germicidal effect; machines for the sterilization of air in air treatment units; regulators and safety accessories for gas equipment; taps for pipes; safety accessories for compressors, namely protective switches, pressure switches; controllers and regulators for air treatment apparatus and air treatment devices, namely controllers and regulators for controlling the flow of gases; compressed air reservoirs being parts of the aforesaid goods; manuals; paper, cardboard and goods made from these materials, namely paper boxes, boxes of cardboard or paper, brand labels of paper, adhesive brand labels made of paper; printed matter, namely, books, magazines, written articles, technical bulletins, data sheets and brochures in the field of compressed air machines, vacuum pump machines, air suction machines, compressors and blowing machines; photographs; computer programs in printed form for use in the operation of compressed air machines, vacuum pump machines, air suctions machines, compressors and blowing machines to enable the compression, generation and purification of air and water

SERVICES

Leasing of installations and equipment for the generation, conducting, storing, release and treatment of compressed air; building construction services, namely the construction of apparatus and devices and installations for compressed air generation distribution and treatment; installation and repair of machines for the generation and distribution of compressed air, and for compressed air treatment, compressed air installations, compressors and compressor installations; installation services relating to apparatus, devices and installations for compressed air generation, compressed air distribution and compressed air treatment; installation and repair of compressors and compressor installations; plumbing; installation, maintenance and repair of machines for and in connection with compressed air generation, compressed air distribution and compressed air treatment; cleaning of compressors and compressed air installations; installation and repair of pipes, namely of pressure pipes; rental of compressors; contracting, namely provision of compressed air for third parties in terms of a distribution/delivery; generation of energy and of compressed air; consultancy services for third parties in the field of generation of energy or of compressed air; machines for the purification of air; air freshening services on behalf of third parties in the field of compressed air, compressors and compressed air applications; rental and leasing of installations serving the generation or supply of energy or of compressed air; contracting, namely the generation of compressed air for third parties; training and further training of engineers, in the field of compressed air, compressors and compressed air applications; education of third parties in the field of compressed air, compressors, blowers, vacuum pumps and compressed air applications; providing of training to third parties in the use, operation and maintenance of compressed air machines, vacuum pump machines, air suction machines, compressors and blowing machines; film production; arranging and conducting of conferences and seminars; technological services regarding the management of installations serving the generation, conduction, storing, release and/or treatment of compressed air; technical consultancy services for third parties in the fields of procurement, generation or utilization of compressed air; scientific and industrial research in the field of compressed air machines, vacuum pump machines, air suction machines, compressors and blowing machines; computer programming; engineering services in the field of compressed air machines, vacuum air pumps, air suction machines, compressors and blowing machines; construction drafting; technical project studies, namely technological planning and consulting in the field of air compression, compressed air machines, vacuum pump machines, air suction machines, compressors and blowing machines; quality control on behalf of third parties exclusively in the fields of compressed air generation, compressed air distribution and compressed air treatment; providing of expert opinions in the field of air compression, compressed air machines, vacuum pump machines, air suction machines, compressors and blowing machines; material testing; all of the aforesaid services exclusively in the fields of compressed air generation, compressed air distribution and compressed air treatment; technical consultancy services in the fields of compressed air generation, compressed air treatment and compressed air distribution; research in the fields of compressed air generation, compressed air treatment and compressed air distribution

Oil for industrial purposes, namely compressor oils, gear oils and motor oils; oils for technical purposes, namely compressors oil, engine oil, heavy oil, penetrating oil, motor oil, industrial oil, oil for lubricating industrial machinery, moistening oil, combustible oil, crank case oil and oils for air compressors, blowers and vacuum pumps; industrial greases; paraffin; dust absorbing compositions; dust wetting compositions; dust binding compositions; machine tools and mechanical apparatus for the generation of compressed air, vacuum pressure and air flow, namely, compressed air pumps, coupling valves, hoses and filters; power operated compressors for the compression of air, power operated blowers for the compression, exhaustion and transport of air; power operated blowing machines for blowing air; air suction machines, namely power operated air blowers and power operated vacuum pumps; vacuum pumps being machines; replacement parts for all the aforesaid goods, namely for machine tools and mechanical apparatus for the generation of compressed air, vacuum pressure and air flow, namely, compressed air pumps, coupling valves, hoses and filters, power operated compressors for the compression of air, power operated blowers for the compression, exhaustion and transport of air, power operated blowing machines for blowing air, air suction machines, namely power operated air blowers and power operated vacuum pumps, vacuum pumps being machines; machines for the generation of compressed air; pneumatic transporters, consisting of air blowers and tubes for transporting bulk material; machines for the generation of compressed air; motors used in machines for the generation of compressed air; compressed air pumps; compressed air vessels being parts of machines; compressed air pressure tanks used in machines and installations which generate and regulate compressed air; pumps being parts of machines, motors and engines; turbines for use in the generation and regulation of compressed air; machine tools for the compression, exhaustion and transport of gases; pneumatic hammers, pneumatic chisels, pneumatic drills; filters, used in machines, motors and engines for the generation of compressed air; air filters for motors and compressors; catalytic converters for the adsorption of hydrocarbon vapors (gas catalytic converters); activated carbon absorbers and catalytic converters, being parts of machines; activated carbon filters for use in compressed air systems, being parts of machines; high pressure filters used in machines for the generation of compressed air; condensate separators being parts of machines, namely centrifugal separators; automatic vacuum cleaners; cooling devices, namely cooling radiators for compressors, motors and blowers; cooling radiators for motors, compressors machines, vacuum pumps, air suction machines and blowers; air condensers; condenser installations, namely, air condensers and air-cooled condensers; de-aerators being parts of machines; oil-separators and de-oilers for separating oil from air being parts of machines; fittings for compressors and machines, namely, condensation separators, drain taps, valves, air receivers, dryers, coolers, anti-vibration mountings, controls, pumps, starter and protection panels, electric motors and pipes; taps being parts of machines and motors; mechanical seals being parts of machines; compressed air main charging systems comprised of controllers and regulators for the control and regulation of compressed air pressure, being parts of machines; regulators being parts of machines for compressors and for vacuum pumps; speed governors for compressed air machines and motors; pressure regulators being parts of machines, namely compensation tanks; valves being parts of machines; pressure reduction valves being parts of machines; pneumatic controls to regulate and control the operation of industrial machines and motors; motors for air compressors, blowers, air suction machines, vacuum pumps; electric motors namely general purpose electric motors for machines; generators of electricity; machines housings, namely housings for compressed air machines, vacuum pump machines, air suction machines, compressors and blowing machines; leveling mounts for machines; stands for machines stands for machines, namely stands specifically designed to support powered machinery; tables for machines, namely tables specifically designed to support powered machinery; couplings and driving belts for machines for industrial use, other than for land vehicles; gear boxes, other than for land vehicles; ball-bearings for use in compressed air machines; shaft couplings being machines; machine cranks; machine wheels being parts of compressed air machines, air suction machines, blowers and vacuum pumps; axles for machines; pump diaphragms; superchargers for compressed air machines; turbo compressors being parts of machines to compress air; fans for motors; anti-pollution controllers and regulators for use in motors and compressors which are parts of machines and motors; heat exchangers being parts of machines; safety accessories for compressors, namely safety valves, regulating valves; compressed air reservoirs being parts of compressors, machines and motors; remote controllers and regulators for compressors, blowers, and vacuum pumps, being parts of machines; apparatus and devices for machine control, namely, pneumatic, hydraulic and mechanical controls and pneumatic and hydraulic and mechanical regulators, all being parts of machines, compressors, blowers or vacuum pumps; electric and electronic controls for air compressors, air blowers, vacuum pumps and electric and electronic controls for air treatment apparatus and air treatment devices, namely for, air dryers, air filters, air purifiers, air coolers, condensate drains and oil mist eliminators; electric and electronic regulating devices for regulating gas flow of compressors, blowers, vacuum pumps, and electric and electronic regulating devices for regulating gas flow of air treatment apparatus and air treatment devices, namely for, air dryers, air filters except those for installation in vehicles and caravans, yet not except for those for installation in portable compressors, air coolers, condensate drains and oil mist eliminators; electric and electronic controllers and regulators for process control and machine control and remote control of industrial processes for the generation, distribution and treatment of compressed air; electronic control devices, namely, compressed air main charging systems comprised of controllers for the regulation of compressed air; integrated circuits; measuring units, automatic time switches and automatic weighing machines for use in the generation, distribution and treatment of compressed air; data processors and data acquirers to enable the generation of compressed air, vacuum and air flow and for the treatment of compressed air; computer programs recorded on data carriers and in data memories, namely software for industrial automation and for operating, controlling, monitoring, sequencing, protecting and maintaining air compressors, air blowers, air dryers, air filters except those for installation in vehicles and caravans, yet not except those for installation in portable compressors, air purifiers, air coolers, condensate drains and oil mist eliminators; computers, computer installations, namely computer hardware, for the control of machines and mechanical devices for the generation of compressed air, vacuum and air flow and for the treatment of compressed air; computer output equipment, namely, printers, recorders for data capture, plotters, terminals, screens, and visual displayers solely as peripheral devices for the control of machines and mechanical devices for the generation of compressed air, vacuum and air flow and for the treatment of compressed air; apparatus and devices for data transmission namely, peripheral devices for the control of machines and mechanical devices for the generation of compressed air, vacuum and air flow, and for the treatment of compressed air; electrotechnical and electronic user interface apparatus and devices, namely electric control panels for use in the generation and regulation of compressed air; sensors for the acquisition of physical quantities, namely for the acquisition of pressure, of temperature, of voltage, of power consumption, of the amplitude of vibration, of operation time, of humidity and of the flow rate of air and other gases; parts of electric control devices, namely electric circuits; apparatus, devices and machines for air treatment, namely, for compressed air conditioning for the separation and deposition of solid and liquid contamination of the compressed air, namely drying, air cooling, air conditioning and air cleaning units; installations to filter air, to remove contaminants arising from the compression of air; industrial air purifiers; air dryers for the removal of moisture and water vapor from compressed air and gases; desiccant (adsorption) dryers; refrigeration dryers; membrane dryers; desiccant and adsorption dryers for the removal of moisture and water vapor from compressed air and gases; air dryers for use in air conditioning systems; refrigeration dryers; air cooling devices, namely cooling radiators for compressors, motors, blowers and vacuum pumps; air coolers, namely compressed air coolers; condensate drains for compressed air applications being parts of refrigerating devices; heat exchangers; condensate water purifiers and filtrators; air filters for air conditioning; compressed air filters being parts of household and industrial installations, namely filters for compressed air conditioners, compressed air coolers, compressed air dryers for compressed air treatment apparatus for the separation and deposition of solid contamination of compressed air; air filtering systems for compressor installations; compressed air filters; dust filters for use in compressed air installations; air purifying lamps having a germicidal effect; machines for the sterilization of air in air treatment units; regulators and safety accessories for gas equipment; taps for pipes; safety accessories for compressors, namely protective switches, pressure switches; controllers and regulators for air treatment apparatus and air treatment devices, namely controllers and regulators for controlling the flow of gases; compressed air reservoirs being parts of the aforesaid goods; manuals; paper, cardboard and goods made from these materials, namely paper boxes, boxes of cardboard or paper, brand labels of paper, adhesive brand labels made of paper; printed matter, namely, books, magazines, written articles, technical bulletins, data sheets and brochures in the field of compressed air machines, vacuum pump machines, air suction machines, compressors and blowing machines; photographs; computer programs in printed form for use in the operation of compressed air machines, vacuum pump machines, air suctions machines, compressors and blowing machines to enable the compression, generation and purification of air and water

SERVICES

Leasing of installations and equipment for the generation, conducting, storing, release and treatment of compressed air; building construction services relating to apparatus and installations for compressed air generation, compressed air distribution and compressed air treatment; installation and repair of machines for the generation and distribution of compressed air, and for compressed air treatment, compressed air installations, compressors and compressor installations; installation of compressed air generators in third party facilities to enable compressed air generation, distribution and treatment; installation and repair of third party compressors and facilities used to generate compressed air; plumbing; installation, maintenance and repair of machines for and in compressed air generation, compressed air distribution and compressed air treatment; cleaning of compressors and compressed air installations; installation and repair of pipes, namely of pressure pipes; rental of compressors; contracting, namely provision of compressed air for third parties in terms of a distribution/delivery; generation of energy and of compressed air; consultancy services for third parties in the field of generation of energy or of compressed air; air freshening services on behalf of third parties in the field of compressed air, compressors and compressed air applications; rental and leasing of installations serving the generation or supply of energy or of compressed air; contracting, namely the generation of compressed air for third parties; training and further training of engineers, in the field of compressed air, compressors and compressed air applications; education of third parties in the field of compressed air, compressors, blowers, vacuum pumps and compressed air applications; providing of training to third parties in the use, operation and maintenance of compressed air machines, vacuum pump machines, air suction machines, compressors and blowing machines; film production; arranging and conducting of conferences and seminars in the field of compressed air machines, air suction machines, vacuum pump machines, compressors and blowing machines; technological services regarding the management of installations serving the generation, conduction, storing, release and/or treatment of compressed air; technical consultancy services for third parties in the fields of procurement, generation or utilization of compressed air; scientific and industrial research in the field of compressed air machines, vacuum pump machines, air suction machines, compressors and blowing machines; computer programming; engineering services in the field of compressed air machines, vacuum air pumps, air suction machines, compressors and blowing machines; construction drafting; technical project studies, namely technological planning and consulting in the field of air compression, compressed air machines, vacuum pump machines, air suction machines, compressors and blowing machines; quality control on behalf of third parties exclusively in the fields of compressed air generation, compressed air distribution and compressed air treatment; providing of expert opinions in the field of air compression, compressed air machines, vacuum pump machines, air suction machines, compressors and blowing machines; material testing; all of the aforesaid services exclusively in the fields of compressed air generation, compressed air distribution and compressed air treatment; technical consultancy services in the fields of compressed air generation, compressed air treatment and compressed air distribution; research in the fields of compressed air generation, compressed air treatment and compressed air distribution
